

# Connected Active Buildings forming Energy Communities

ISGAN-SIRFN, EERA JP Smart Grids, Mission Innovation and DERlab  
Joint Workshop on *"Digitization, Research and Testing of Energy Systems for Energy  
Markets Decision Support"* – *Energy Communities panel session*

FHP project is funded by European Union under the grant agreement no. 731231.

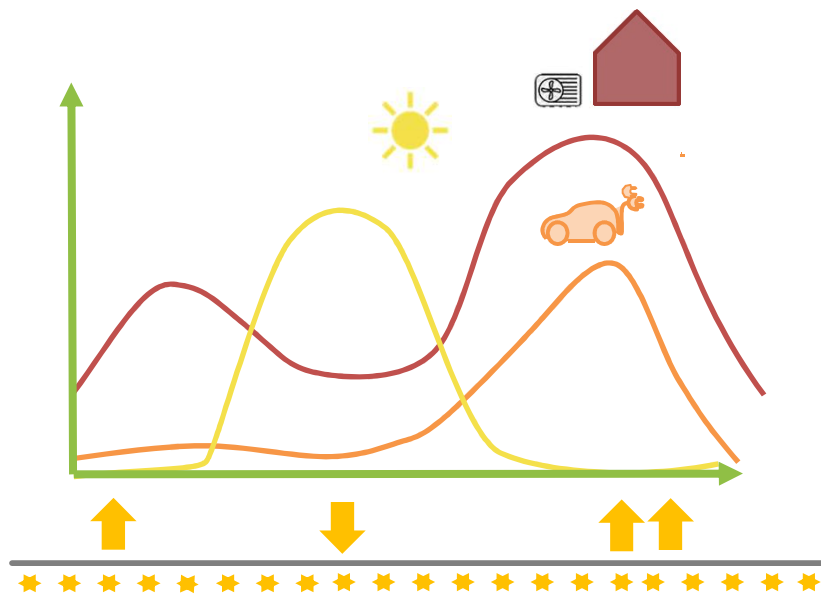

Chris Caerts (VITO)

# The challenge

## Building: consumption and generation peaks

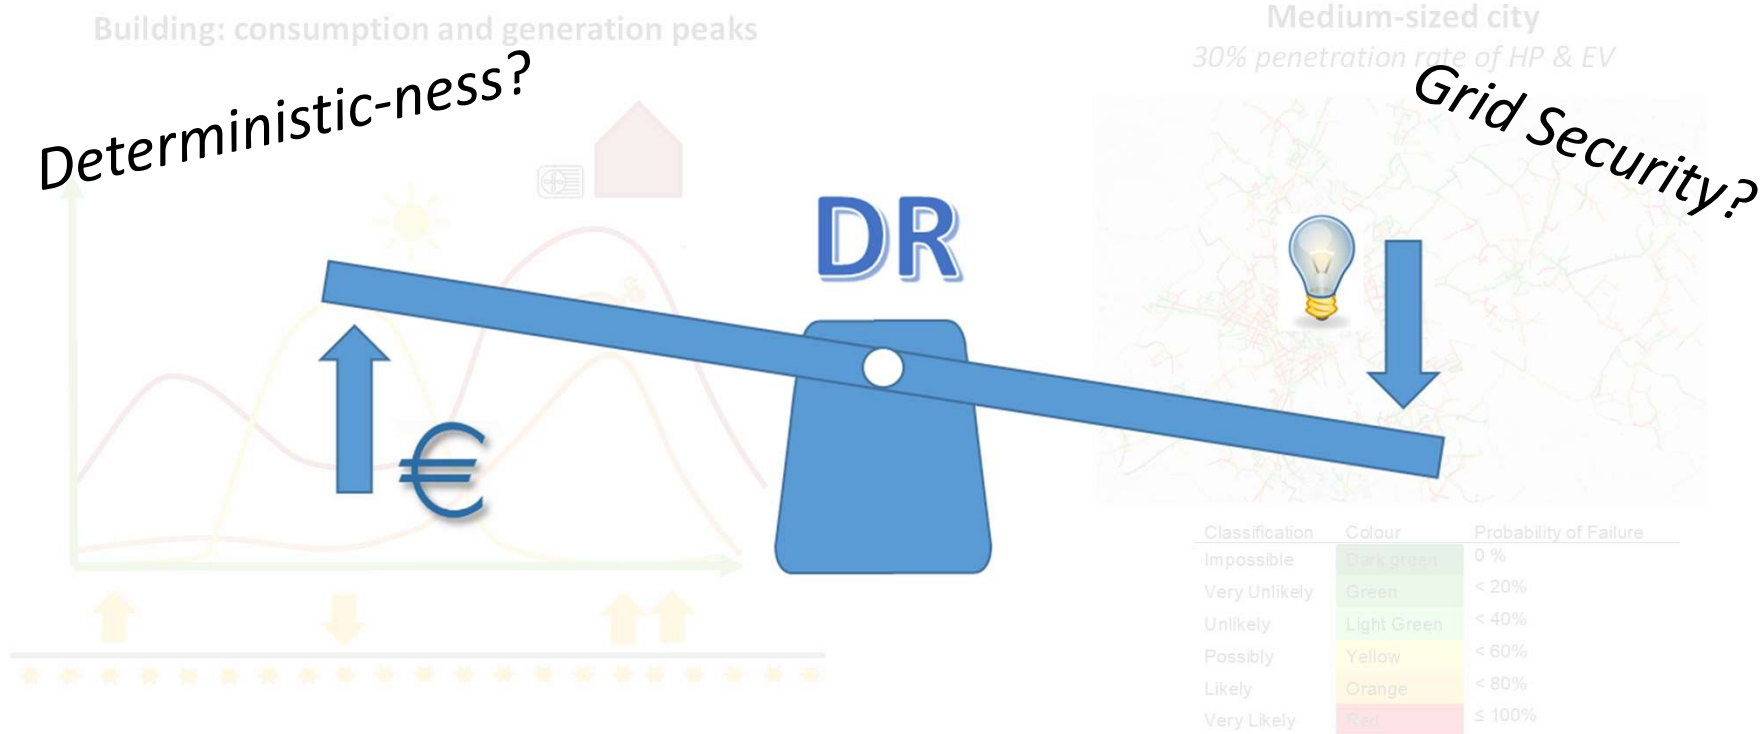

## Medium-sized city @ 30% penetration rate of HP & EV

Classification	Colour	Probability of Failure
Impossible	Dark green	0 %
Very Unlikely	Green	< 20%
Unlikely	Light Green	< 40%
Possibly	Yellow	< 60%
Likely	Orange	< 80%
Very Likely	Red	≤ 100%

# Solution: DR?

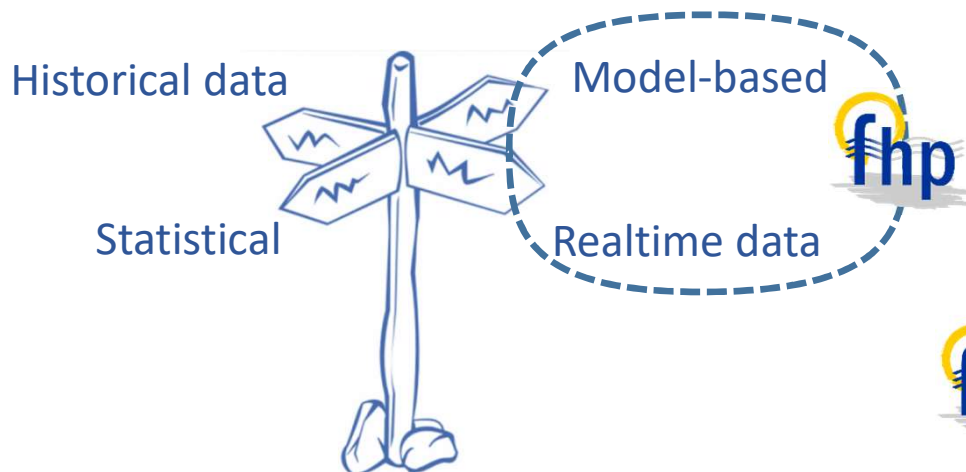

# Decentralization: Energy Communities

- Community: cluster of local (DG connected) flexibility
  - Local (DG) problems (e.g. congestion): forecasting
  - System level problem (e.g. balance): forecasting & clearing by DSO (local constraints)

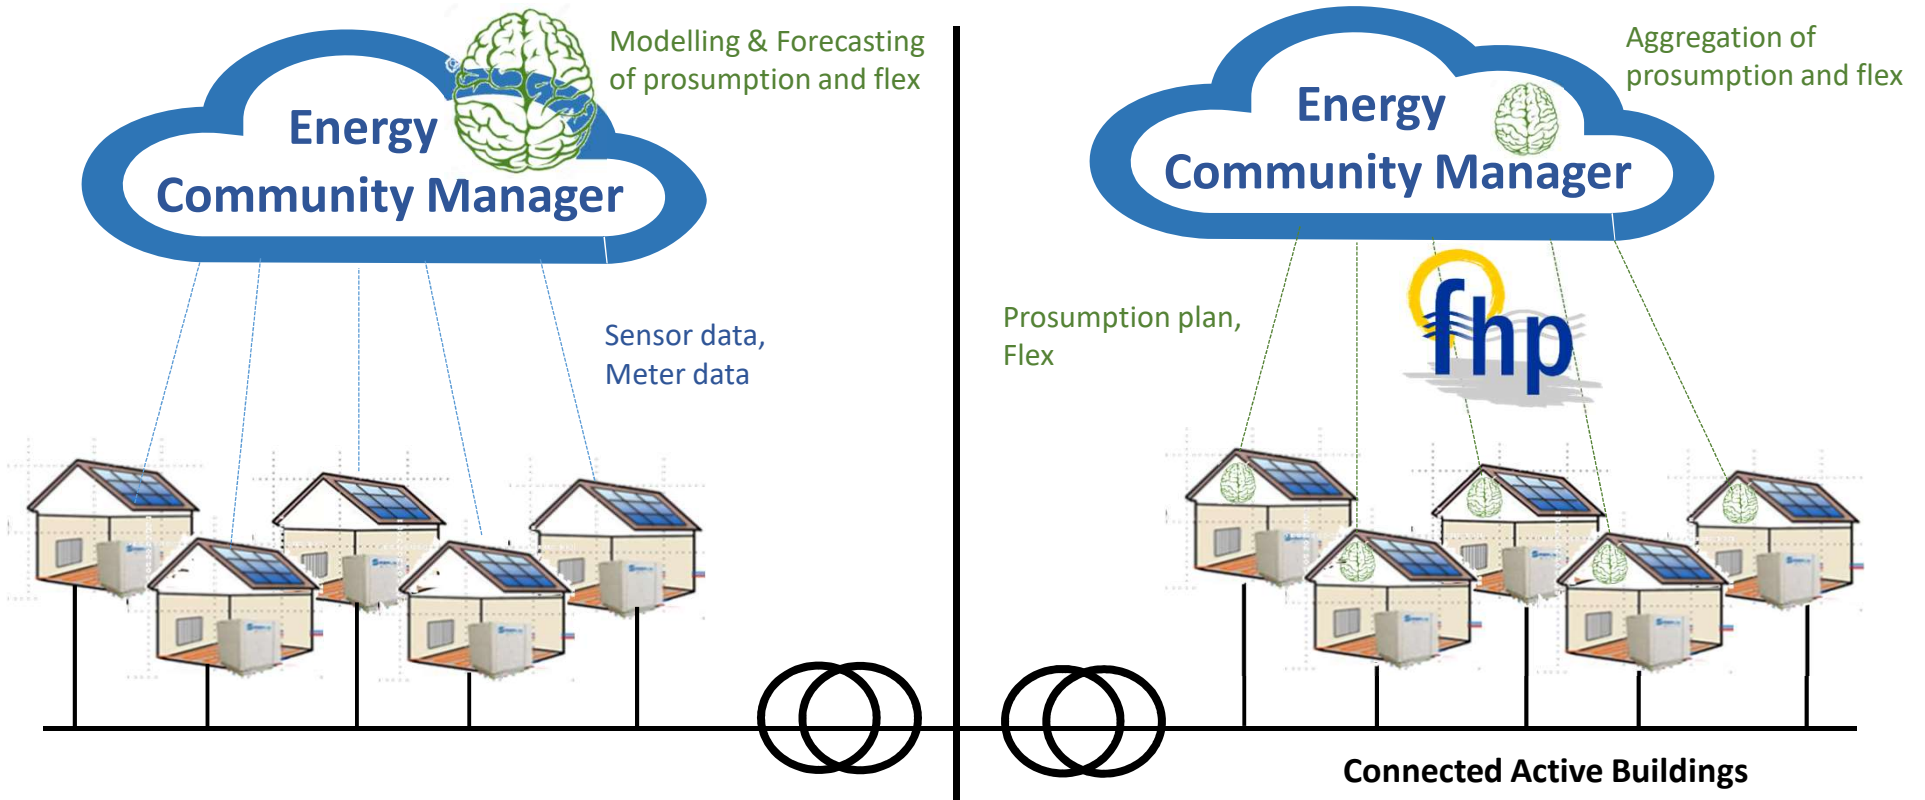

## Forecasting

## Clearing

# Distributed Intelligence

FHP project is funded by European Union under the grant agreement no. 731231.

# FHP Dynamic Coalition Manager concept for Energy Communities

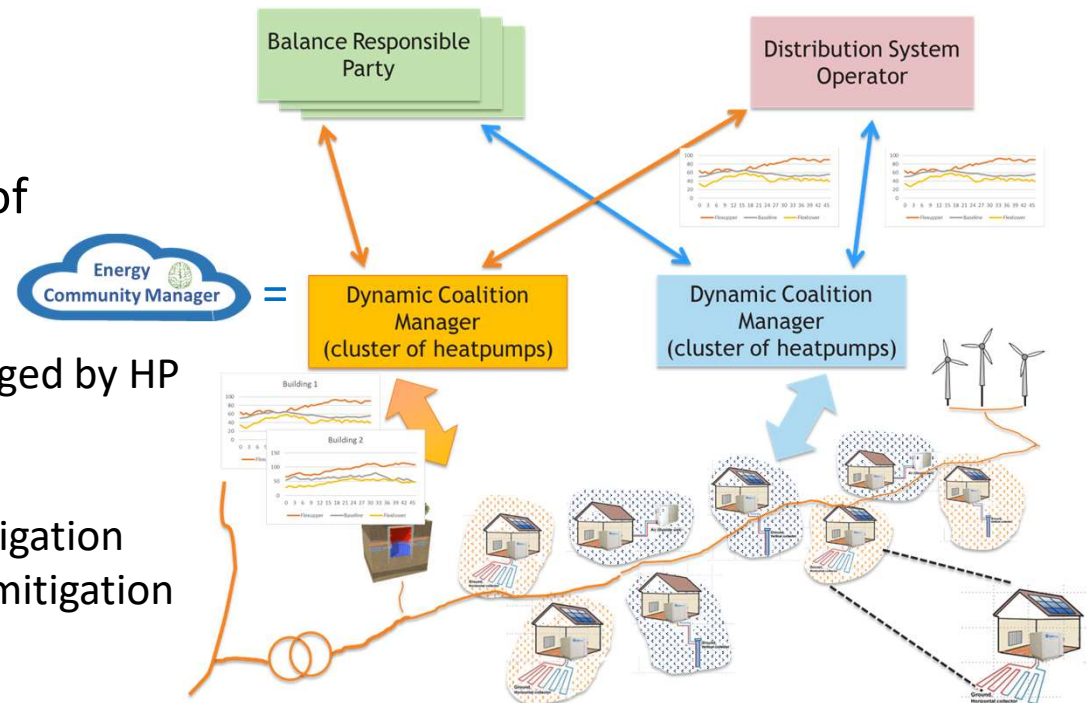

## Flexible Power and Heat

### Managing community/collection of Connected Active Buildings

- Buildings with HP
- Large seasonal Thermal Storage, charged by HP

### Offer Grid-Aware Flex Services

- Local (technical) RES curtailment mitigation
- System (Economic) RES curtailment mitigation
- Balancing
- ...
